

# Are you an aboriginal student pursuing studies in the natural sciences or engineering?

## Aboriginal Ambassadors in the Natural Sciences and Engineering Supplement Program (AANSE)

Are you interested in sharing your experiences by traveling to communities and schools to promote these exciting fields to aboriginal youth?

The Aboriginal Ambassadors in the Natural Sciences and Engineering Supplement Program (AANSE) can help you make a solid contribution to promoting science and engineering among Aboriginal youth in Canada. The supplement covers up to \$5,000 for costs associated with the proposed science and engineering promotion activity, and Aboriginal community or school visit.

This supplement program is available to Aboriginal persons who maintain full-time study and an active NSERC scholarship or fellowship (USRA, Vanier CGS, CGS, PGS, PDF, IPS, IRDF or Northern Research Internship). The supplement aims to engage Aboriginal students and fellows in promoting interest and participation in the natural sciences and engineering by visiting Canada's Aboriginal communities and schools and sharing their research and education experiences, or participating in science promotion events and activities.

There is no fixed application deadline for this program. Applications must be made at least two months before the start of a proposed outreach activity. The AANSE supplements available in any given year will be awarded on a first-come, first-served basis.
